

N&N Paddlemixer MIX-450 with meatbinlift

The MIX-Series Paddle Mixers from N&N Nadratowski are the most universal type of mixers on the market, capable of mixing most types of products gently, effectively and quickly.

This is a 450-liter version and is equipped with a meatbinlift according to configuration C. (See images for reference drawing)

The mixing process consists of two interlocking paddle shafts. Mixing is done by turning both shafts in opposite directions, counterclockwise or clockwise, at the same preset speed.

The large ejection valve at the bottom of the mixing bowl and minimal space between the paddles and the bowl (3 mm) ensure a very short ejection time.

The MIX-450 from N&N

1. Equipped with a user-friendly Mitsubishi branded digital touchscreen. The software allows manual and automatic operation and up to 100 mixing programmes, where each programme can consist of 5 programmable steps.
2. Equipped with NORD brand motors
3. Is equipped with standard trolley lift

Are you looking for the right solution for your production process? The Havantec specialists will gladly think along with you!
